SUMMARY

Game Designer blending creative vision with high-level production acumen to craft culturally immersive, systems-driven titles.

- Design & Execution:** Drives cross-functional development from rapid prototyping in Unity 3D and UE5 to highly polished gameplay loops.
- Industry-Recognized:** Selected for the prestigious ID@Xbox Developer Acceleration Program (DAP) and finalist in the Games for Change (G4C) Student Challenge.
- Proven Track Record:** Consistently delivers compelling narrative and level design, highlighted by successful international showcases like **SXSW Sydney**.
- Strategic Insight:** Deeply connected within the global game development ecosystem, leveraging direct industry analysis to inform market-driven, player-centric design decisions.

WORK EXPERIENCE

Lead Game Designer & Founder Desi Woofs Studios	Feb 2024 - Present
- Designing narrative branches and gameplay systems for the culturally immersive title Desi Woofs using Unity 3D. - Selected for the exclusive ID@Xbox Developer Acceleration Program (DAP), securing critical platform support and technical resources. - Cleared Phase 2 of Shark Tank India, successfully pitching the studio's design vision and business model to gain high-level industry validation.
